

STORYBOARD

List of web pages and their intent.

1. Index Page – Serves as a welcome message and a home page for the user

2. Professional Page – A page to show my previous achievements and duties as if showing a resume

3. Personality Page- Provides the user with an insight about who I am

4. Personal Development- A web page dedicated to show my ability to grow after consuming media

5. Storyboard- To display my ever-evolving idea of the formatting of the webpage

6. References- Citing any information I used in my project that I do not own

My theme for the webpage was a personal choice, although green is my favorite color I think blue is a lot more likeable to the eyes so I went for a dark theme as it would be easier to look at too. I used gifs to help liven up each webpage with each fitting the context.

List of features.
